

**[TOPIC]Wood Tone Cove Base is renewed.  
Equipped with antifouling, antibacterial,  
and mold-resistant properties.**

MB-304

Made of soft vinyl, the "Soft Cove Base" is thin, flexible, easy to install, easy to clean, and cost-effective product. It is used in a wide variety of buildings to seamlessly integrate floor and wall surfaces. Available in beige, brown, white, gray, black, and many other colors, it can be matched to various space concepts, floors, walls, and furniture.

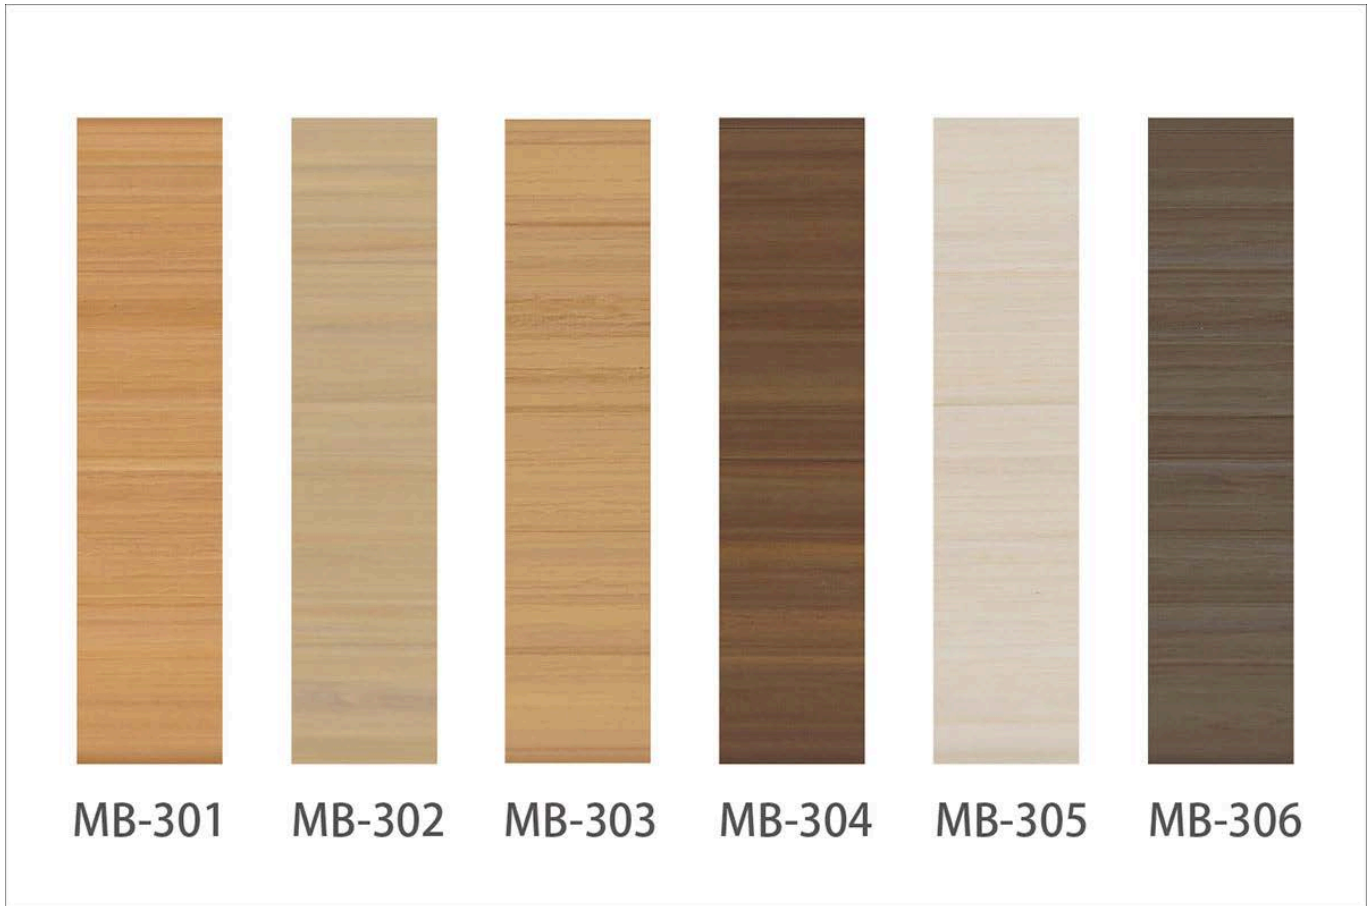

Assuming you may want to use a wood-grain cove base in spaces with a lot of wood-based interior design, or when you wish to create a softer, more inviting atmosphere, the "Wood Tone Cove Base" is highly recommended. It combines the flexibility of the "Soft Cove Base" with the attractive texture of wood grain. We have recently updated the product, now offering a lineup of six new colors, along with enhanced properties, including antifouling, antibacterial, and mold-resistant features.

## Combination of realistic wood-grain texture and versatile properties.

The newly renewed product is made using an updated manufacturing process to create a realistic and attractive wood-grain texture with embossing, while maintaining the same properties, including antifouling, antibacterial, and mold-resistant features, as the current "Soft Cove Base." Compared to the previous version, the latest model is stain-resistant and easy to clean, keeping the lower part of the wall surface looking cleaner and more beautiful.

**Six new colors, well-coordinated with flooring, wall coverings,  
and other interior materials.**

The six new colors have been designed and developed primarily for medical, welfare, and commercial facilities, harmonizing well with interior materials like flooring and wall coverings. Color code 301 is a long-selling, high-saturation color, while colors 302, 303, and 304 are light, medium, and dark shades with medium saturation, suitable for pairing with a range of interior materials. Colors 305 and 306 are low-saturation options, designed specifically to complement wall coverings.

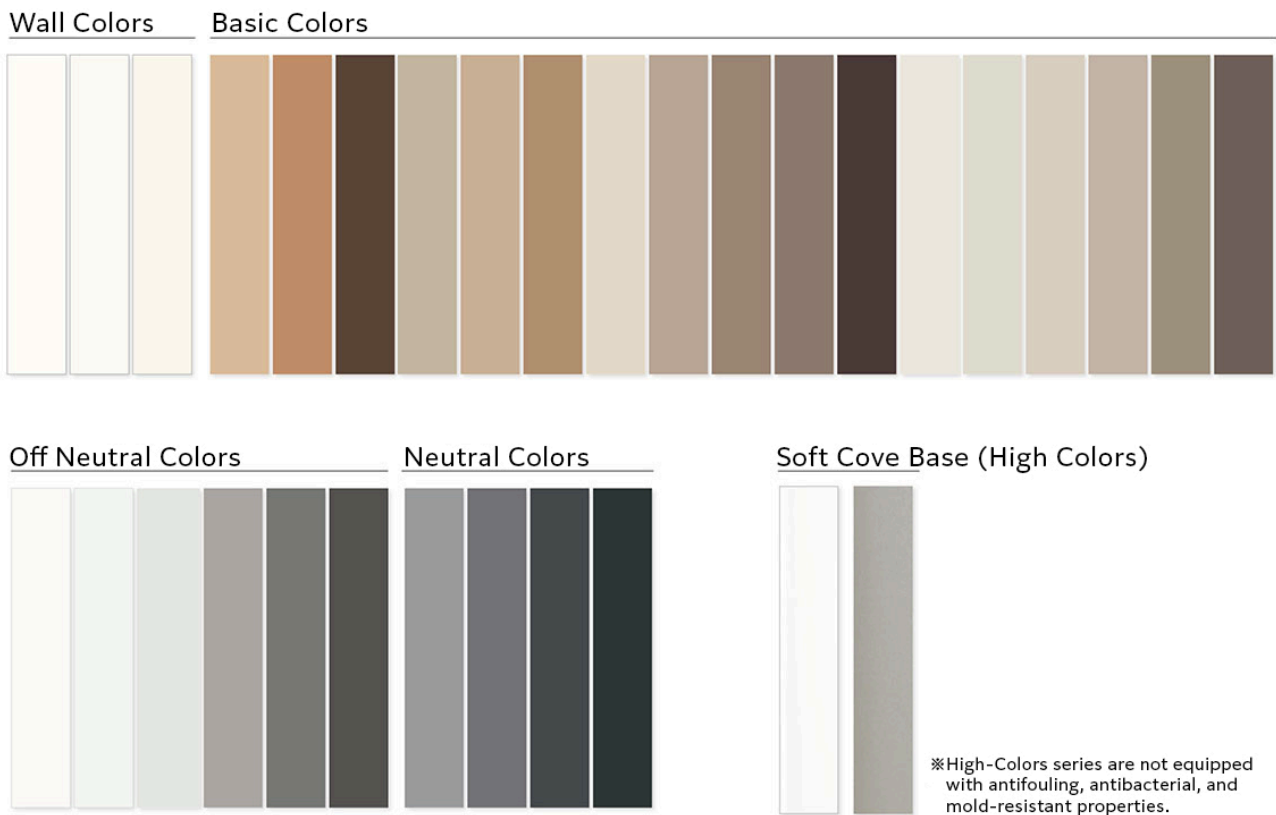

Two types are available: the "Long Cove Base (roll type)", with heights of 60mm, 75mm, or 100mm and a length of 25m, and the "Wide Cove Base", with a height of 300mm and a length of 9m.

※The 100mm height option is made to order.

WH-303

# An extensive lineup of standard plain color options.

This line-up are also equipped with antifouling, antibacterial, and mold-resistant properties and available in a wide range of colors, mainly targeting medical and welfare facilities. A wide range of sizes and types are available, including "Long Cove Base" with a length of 25 m, "Wide Cove Base" with a height of 300 mm, and "Stair Skirting" for stairs.

※For the detail please contact to Tajima distributor in you region.

## Minimal 30mm-high Cove Base "Hitofude" series.

LSA-34(Standard Type)

LTA-80(Thick Type)

A minimalist cove base with a height of 30mm is also available in the 'Hitofude' series (meaning 'one-stroke' in Japanese calligraphy). Its subtle design blends well within spaces and pairs elegantly with elements like window frame widths to create a refined atmosphere. This cove base comes in a 25m roll, and in addition to the standard thickness, a 4.0mm thick option is also available.

## Explore TAJIMA's extensive and appealing cove base lineup!

The product name "Soft Cove Base" in Japan originated from TAJIMA's first product, developed and manufactured in 1958. Since then, TAJIMA has continued to enhance its products to meet market needs and trends, offering solutions for a wide range of design applications. We hope that the addition of the renewed "Wood Tone Cove Base" to our lineup provides yet another option for creating attractive spaces.
